INSTRUMENT TITLE: 7-day Recall of Late Doses

SOURCE ARTICLE: Chaiyachati, K., Hirschhorn, L. R., Tanser, F., Newell, M. L., & Bärnighausen, T. (2011). Validating five questions of antiretroviral nonadherence in a public-sector treatment program in rural South Africa. *AIDS patient care and STDs*, 25(3), 163-170.

POPULATION: Women, men, HIV-positive, patients

RESPONSE OPTIONS: Number of times

SCORING: Less than 95% adherent = nonadherent

SURVEY ITEMS: “During the last 7 days, how many times, in total, did you take one or more of your antiretroviral pills more than two hours late?”

RELIABILITY INFORMATION: No reliability information reported.

VALIDITY INFORMATION: Criterion-related validity assessed via comparison with viral load.

TERMS OF USE:

Individuals may use this information for research or educational purposes only and may not use this information for commercial purposes. When using this instrument, please cite:
